About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting further from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Other Important Health and Safety Information

The Xbox video game system documentation contains important safety and health information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

GAME SCREEN

RACE EVENTS

Battle the competition to be the first to the finish line. Earn medals for placing plus burnout points for skillful—or just plain crazy—driving.

RACE

Do whatever it takes to finish first.

GRAND PRIX

Earn GP points for qualifying in a series of races. Your goal is to get the highest combined score.

ELIMINATOR

Stay ahead to win: the driver in last place at the end of each lap is knocked out.

FACE OFF

Race one-on-one against a challenger to win their car.

ROAD RAGE

Take down as many rival racers as possible in the time limit. Hit the Takedown targets to win medals.

NOTE: In this mode your car takes damage when you crash. After the "Damage Critical" message appears, one more smash totals your car and ends the event!

BURNING LAP SPECIAL EVENTS

Beat the bronze, silver, or gold time in one lap to earn medals.

Burners with a fistful of gold medals get invited to exclusive special events.

SELECT CAR/GARAGE

Choose a cool ride from the selection in your garage.

⚙ Move to select a vehicle type (when available).

⚙ Move to select a model.

⚙ Press to change the vehicle color.

NOTE: Silhouetted vehicles must be unlocked before you can drive them. Highlight one to find out how to make it yours.

RISK AND REWARD

Making it in *Burnout 3: Takedown* is all about taking chances and driving aggressively. Fill your boost bar to speed into the lead and take down rivals to eliminate the competition.

BOOST BAR

If you want to keep up with the competition, fill your boost bar to give yourself a speed advantage. Driving dangerously gets you started.

Live Dangerously

Weave through oncoming traffic, risk near-misses, drift around bends, or catch air on a hill crest. The blue flicker tells you you're earning boost, and when it turns to a bright orange flame, release it with a nitro-blast by pressing .

BOOST WARS

Shove opponents to steal their boost, but expect the favor to be returned.

TAKEDOWNS

Takedowns are where you stand to gain the most boosts. Smash an opponent off the track to extend and fill the boost bar: one section is added per takedown, to a maximum of four. Suffer a takedown or crash and one of those sections is lost.

Get Nasty

Clip fast-moving drivers into the trackside for a wall takedown, or boost-smash a rival into oncoming vehicles for a car, van, or big rig takedown.

Rack 'em Up

String two or more takedowns together. Now you're really racking up the points!

Takedown Avenged

Opponents don't take your attacks lightly. Watch their position markers change color. When they hit red, they're ready to ram you off the road! Steer out of trouble when they smash you—takedown denied!

Sweet Memories

That camera flash means you just scored a signature takedown. Check your photo album for clues about how to make another one (see p. 8). Signature takedowns also score you more points.

BURNOUT POINTS

Spectacular driving of all kinds earns you burnout points too. Go for aggressive driving rewards with stunts such as rubbing, duelling, slams, and shoves, or show off your driving skills by leading laps, pulling off a cool drift, weaving through oncoming traffic, and more.

ONCOMING ★
NEAR MISS

Keep up the dangerous driving for long enough and a rotating star appears above your boost bar. As you continue the star fills in. If you keep up that fancy driving long enough to fill up all three stars you earn up to 100 burnout points!

AFTERTOUCH

After you crash, press and hold to switch to "slo-mo" impact time, then move to add Aftertouch and guide your wreck. Smash into big vehicles, spill payloads, flip out, or slide. All of these forms of Aftertouch add up to valuable burnout points!

⚙ Use Aftertouch in race events to steer your wreck into your opponents and score an Aftertouch Takedown—and keep that precious boost bar segment!

CRASH EVENTS

What could match the satisfaction of slamming your way into first place? How about creating a multi-car pile-up—and raking in crash \$ to unlock vehicles in the process!

⚙ Your basic aim is to hit as many vehicles as possible. Crash \$ are awarded for the number totalled and the amount of damage you inflict on them: different vehicles have different values.

⚙ Each event has a different Crashbreaker target, which counts down with every wreck piled up. Cause enough vehicles to crash and you can press to detonate your car, tag a few more vehicles—and cause even more crash \$-earning damage.

⚙ Use ramps to get air, then use Aftertouch to guide yourself into the traffic or towards pick-ups which can help or hinder your efforts:

Drive through the instant boost for instant speed.

Bronze, silver, and gold cash bonus pick-ups add instant crash \$, while x2 and x4 multiplier pick-ups multiply your total.

Hit a Crashbreaker pick-up to explode instant wreckage around your car! It'll earn you some more crash \$ too.

Avoid the Heartbreaker—it nullifies multipliers and halves your final crash \$ total.

(Double Impact only) Think your rival crash-maker is out-scoring you? Swipe this to switch points on the sly.

⚙ If you get a Crashbreaker, use Aftertouch again to seek out any pick-ups you missed.

⚙ **MULTIPLAYER CRASH EVENTS** put a spin on collecting pick-ups. In Team Crush, both players must collect the x2 or x4 multipliers for them to take effect, but in a competitive Crash event, you'll be jostling to collect the pick-ups. Using Crashbreaker in a competitive mode detonates the other player's car and puts them out of the running!

JUST HOW DANGEROUS WAS THAT?

After each event on the World Tour a series of results screens appear and your progress is autosaved. Hit target scores or reach new goals to reveal unlocked rewards.

- ⌘ Different information is displayed for different events.
- ⌘ At the first results screen, choose CONTINUE to progress, or select RETRY to try again.
- ⌘ Press **B** at the first results screen for an all-action replay.
- ⌘ **GLOBAL SCORES:** Check out your global burnout points, takedown total, and crash \$ total scores. These are your total earnings so far for the current profile. When these figures hit the "Win Car At" amount listed below them, a new vehicle is unlocked!

WHAT'S IN IT FOR ME?

- ⌘ Choose REWARDS from the Driver Details screen at the Main menu to admire the results of your reckless driving.
 - ⌘ If a reward is greyed out, you just haven't earned it yet—highlight it to find out how to make it yours!
